The AI Workflow Automation Blueprint

Stop doing everything yourself.

Build systems that run while you sleep.

By Aeloria · aeloria.ai

THE PROBLEM

You're not working. You're drowning.

If you're a solopreneur, you know this feeling:

- 6am: Already answering emails before your coffee's cold
- 10am: Scheduling, invoicing, chasing payments
- 2pm: Client calls you left and right
- 6pm: Still haven't done the actual work you started the day for
- 11pm: "I'll just quickly check my phone" — you can't sleep

The truth nobody tells you:

It's not that you're not working hard enough.

It's that you're the bottleneck in your own business.

You can't hire yourself.

But you can build systems that work like you.

The 5 Lies About AI Entrepreneurship

Lie 1: "You need to be a tech genius"

You don't. You need to know what you want. The AI handles the how.

Lie 2: "It replaces humans entirely"

It doesn't. It handles the stuff you hate — the repetitive, the administrative, the boring.

Lie 3: "Set it up once and forget it"

You can't. Every system needs tending. But 10 minutes of maintenance beats 10 hours of manual work.

Lie 4: "You need a huge budget"

Most of what you need is free or under \$30/mo.

Lie 5: "Overnight success is real"

Consistency is unglamorous. But it's the only thing that compounds.

START HERE

Your First Automation in 30 minutes

The Email triage automation:

Tools needed: Gmail + a free Make.com account

1. Create a filter in Gmail that labels all inbound client emails as "LEAD" or "SUPPORT"
2. In Make.com, create a scenario that:
 - Triggers when a new email arrives
 - Reads the subject line with AI
 - Sends an auto-reply based on intent (qualified lead → booking link | support → help doc)
 - Adds the contact to your CRM spreadsheet

Result: You're sleeping. Your inbox is sorting itself.

The 5 Core Automations Every Solopreneur Needs

1. Email triage (above)

2. Client onboarding sequence

When a client signs a contract:

→ Send welcome email

→ Send invoice

→ Send onboarding questionnaire

→ Create calendar link

→ Add to your project management tool

All on autopilot.

3. Social media scheduler

Batch create content once a week. Schedule it for the whole week.

Tools: Buffer or Publer (\$0-15/mo)

4. Lead capture form

Every new inquiry gets added to your email list AND your DM queue.

No more lost leads from "I'll reply later and forget."

5. Monthly financial snapshot

Every month: AI pulls your expenses, categorises them, and sends you a one-page report.

No more dreading tax season.

My Stack — What I Actually Use

TASK	TOOL	COST
AI assistant	ChatGPT / Claude	\$20/mo
Scheduling	Calendly	Free
Email	Gmail (personal) + HEY (business)	\$3/mo
Automation	Make.com	Free–15/mo
CRM	Google Sheets (yes, really)	Free
Content scheduling	Buffer	\$0–15/mo
Contracts/invoicing	Shopify Pay or Stripe	Free

You don't need 47 tools. You need 5 that talk to each other.

The 3 Mistakes That Kill Automations

Mistake 1: Automating chaos

If your process is messy, automating it just makes the mess faster.

Fix the process first. Automate second.

Mistake 2: Trying to automate everything

Start with ONE thing. The thing that takes the most time and the least thinking.

Usually: email triage, or invoice reminders, or social media scheduling.

Mistake 3: Setting it and forgetting it

Check your automations weekly for the first month.

Things change. Upstream apps update. Assumptions break.

Your 5-Day Setup Sprint

Day 1 — Audit

Write down everything you do manually that takes more than 5 minutes.

Day 2 — Pick one

Choose the task that costs you the most time and the least brain power.

This is your first automation.

Day 3 — Learn Make.com

Create a free account. Watch 2 of their template videos.

You don't need to understand everything — just enough to copy a template.

Day 4 — Build it

Follow a template for your specific task.

It won't be perfect. It doesn't need to be.

Day 5 — Test and launch

Run it manually 3 times. Fix what breaks.

Then turn it on and let it run.

Most people think *"I need to do more."*

Most people think: *"I need to do more"*

Successful solopreneurs think: *"I need to build systems that do more"*

You are not meant to be the doer.

You are meant to be the builder.

The AI tools are your team.

You are the founder.

What's Next

This guide was the "what". Now for the "how":

Join my daily Instagram where I break down real AI workflows, tools, and automations — one at a time, with the actual steps.

Follow: @[AELORIA_USERNAME]

Or comment "WORKFLOW" below any post — I'll send you the exact template I use for my client onboarding automation (the one that runs while I sleep).

Comment **WORKFLOW on any of my Instagram posts** — I'll send you the exact template I use for my client onboarding automation.
